B/ If you visit Japan, you might choose to travel around the country by "Shinkansen" train. These high-speed trains connect the major cities of Japan. They are nicknamed "bullet trains" because they go very fast and have pointy noses like a bullet. Bullet trains are a good way to travel for several reasons other than their speed. They are very punctual, often leaving on time to the second. They are also comfortable. Most importantly, bullet trains are very safe. In their 35-year history, there have been only a few accidents and no

deaths. The only downside to bullet trains is that they are expensive. A ticket to travel to another city can cost almost as much as an airline ticket would. Train stations are usually right in the middle of a city. This means that it is often more convenient to take a bullet train instead of flying, because you will arrive exactly where you want to be.

This year, I'm studying ten subjects. My favorite subject is geography. At the moment, we are doing a project about the environment. It's about the way the world's temperature is increasing and its effect on the weather. I'm definitely interested in studying geography at university. I also go to an after-school club at school.
