**IV/ PASSAGES**

These days, more and more people are reporting strange experiences with aliens and UFOs. I think it's really exciting. Last month, a woman was doing the laundry when she saw a huge object in the sky above her house. She is sure it was a flying saucer. Yesterday, a teenage boy was studying at the library when he saw a tall man with green skin and blue hair. He was laughing. The boy was very scared. If aliens are real, why do they come to our planet? Some people say that aliens like the temperature or gravity here, but I don't agree. I think they want to meet people. I think that in the future, more and more will come to our planet. I hope that we will be able to ride in their flying saucers, too!

**TRUE OR FALSE**

|                                                                                       |  |
|---------------------------------------------------------------------------------------|--|
| 1. The writer thinks that alien and UFO sighting is exciting.                         |  |
| 2. The woman saw a flying object while she was doing the laundry.                     |  |
| 3. The teenage boy was learning when he saw an alien.                                 |  |
| 4. The boy was terrified when he saw the alien.                                       |  |
| 5. The writer thinks aliens come to Earth_____.                                       |  |
| A. for the temperature      B. for the gravity      C. to meet people      D. to live |  |
| 6. What does the writer want to do in the future?                                     |  |
| A. ride in flying saucers                      B. visit alien's planet                |  |
| C. study aliens                                      D. see their flying saucers      |  |

| 6. A. terrified | B. terrify      | C. scare       | D. scary      |

**2/**

An unidentified flying object, or UFO, is anything in the sky that the person who sees it cannot explain. Some people believe UFOs are alien spacecraft. However, most scientists believe that it can be easier to explain UFOs. A UFO has different descriptions. It can take the form of a disk, triangle or even an egg. After a sighting of a disk-shaped UFO in the 1940s, the term "flying saucer" became popular. It soon became fashionable to call all UFOs flying saucers. Nowadays, there are reports of thousands of UFO sightings. These are photographs of UFOs and conversations with the people who saw UFOs. In the 1950s, the government asked a group of scientists to study hundreds of sightings. However, most sightings were just space objects like stars, planets or meteors. A lot of other sightings were only aircraft, birds or hot gases. However, such things didn't stop people from reporting UFOs. By the mid-1960s, there were even more sightings of UFOs than ever. People also found that most UFO or alien sightings happened in bad weather. But governments around the world still believed that UFOs were

unreal. Other scientists agreed. But it was hard to explain why UFOs still appeared. Nowadays, researchers believe that UFOs might be visitors from space.

### **TRUE OR FALSE**

|                                                                                                                                                                                           |  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 1. It is easy for a person to describe a UFO when he or she sees it.                                                                                                                      |  |
| 2. A UFO can be a disk-shaped or egg-shaped object.                                                                                                                                       |  |
| 3. The term "flying saucer" were popular in 1940s.                                                                                                                                        |  |
| 4. There are thousands of UFO sightings these days.                                                                                                                                       |  |
| 5. The researchers started to study UFO sightings because of photographs of UFOs and conversations with the people who saw UFOs.                                                          |  |
| 6. All of UFOs sightings were just space objects like stars, planets, meteors or everyday things like bird, hot gases, aircraft.                                                          |  |

**UNIT 6: LIFE ON OTHER PLANETS**  
**LESSON 1.3**

**V/ PASSAGES**

**1/** A New Home in the future

By James Stone

Our planet, Earth, is becoming more and more (1) \_\_\_\_\_. The world's population will reach 11 billion (2) \_\_\_\_\_ 2100. I think we will need to find a new home in the future. The options are really exciting!

One option is to live on another planet, like Mars or Venus. It's important that the planet has similar gravity to Earth. We need gravity to stay healthy and on the ground. Venus's gravity is (3) \_\_\_\_\_ to Earth's, but Mars's is much lower. (4) \_\_\_\_\_ will also be a problem. Mars is very cold, and Venus is very hot. People will need to stay inside all the time. Mars and Venus also don't have enough oxygen for humans.

Another option is to live in space stations. We can build these near Earth, so people won't (5) \_\_\_\_\_ travel far. However, they're small. There won't be room for people to move around. Also, there's no gravity on a space station. Living there for a long time will (6) \_\_\_\_\_ people's health.

We don't know where our next home will be yet. There's no other place like Earth. Our new home will be strange, but very exciting!

|                   |            |              |            |
|-------------------|------------|--------------|------------|
| 1. A. full        | B. many    | C. narrowed  | D. crowded |
| 2. A. on          | B. at      | C. to        | D. by      |
| 3. A. different   | B. same    | C. similar   | D. higher  |
| 4. A. temperature | B are      | C. look      | D. looks   |
| 5. A. need        | B. have to | C. must      | D. be      |
| 6. A. reach       | B. help    | C. stabilize | D. affect  |

**2/** Earth's population is growing more quickly every year. I think that someday in the future, we will need to leave Earth and travel to new planets. I think that the best options are two planets near us in space, Mars and Venus. But which one will we travel to first?

Mars is often called "the Red Planet" because of its color. It is further from the sun than Earth, so it's very cold. It is much smaller than Earth, so the gravity there is very low and there isn't much oxygen, too. I will cause health problems for humans living there for a long time.

Venus is often called Earth's "sister planet". The two planets are almost the same size, so the gravity is very similar to Earth's. However, Venus's temperature is very hot, and the air is dangerous.

In my opinion, both planets are dangerous. However, traveling to Venus is more dangerous and difficult.

I think that we will visit Mars first. I hope that we will learn more about other planets later, too.

### TRUE OR FALSE

|                                                                                                                                             |       |
|---------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 1.Venus and Mars are the best options because they are near us in space.                                                                    | True  |
| 2.Mars is cold because it's closer to the sun than us.                                                                                      | False |
| 3.Mars has much oxygen compared to Earth.                                                                                                   | False |
| 4.Venus is known as the "sister planet" of the Earth.                                                                                       | True  |
| 5.Venus's gravity is almost the same as Earth's.                                                                                            | True  |
| 6.The air on Venus is very dangerous.                                                                                                       | True  |
| 7.Mars's temperature is very _____.<br>A. hot <b>B cold</b> C. safe     D. higher                                                           |       |
| 8.The writer wants to _____ about other plants, too.<br>A. explore     B. discover <b>C. learn</b> D. talk                                  |       |
| 1. Which is less dangerous and difficult to travel according to the writer?<br><b>A. Mar</b> B. Venus     C. the moon     D. another planet |       |
