→ The girl .....
29. The picture was painted by Leonardo D. Vinci. It is hung over there.  
→ The picture .....
30. Keeping personal hygiene is a good way for you.  
→ It's .....

## V. READING

**A.** It is estimated that avoidable waste costs UK businesses up to 4.5% of their annual revenue. Reducing waste in the workplace is about being efficient. By becoming more efficient, businesses not only increase profits but they also save natural resources.

*What to recycle and how*

### **Paper**

According to a recent survey, 65% of waste produced is paper waste. The waste paper will inevitably be produced in the workplace, but it is not necessary to discard it. It can serve a variety of purposes before it is recycled, such as writing notes. Envelopes too can be re-used for internal mail.

### **Plastic cups**

Rather than supplying disposable plastic cups in your workplace, get ceramic mugs that can be re-used. Not only do they make your tea taste better, but they can reduce your office waste by up to 1%!

### **Electrical equipment**

Rather than giving up on any old electrical equipment and just throwing it away, why not try upgrading it? This reduces waste, as well as avoiding the need to manufacture a new machine – a process which creates a large amount of waste. You could also consider donating your old computers to charities when it comes to replacing them.

**B.** Garbage is a serious problem in the United States. Every year, Americans produce 308 billion pounds of garbage (about 140 billion kilos)! A lot of garbage goes into landfills. But many landfills don't have enough room for all the garbage.

One answer to the garbage problem is recycling. Half of the garbage in the United States can be recycled and used again. Recycling helps the landfill problem and saves enough energy too. When people recycle newspaper, they save trees. When they recycle glass, plastic, or cans, they save oil and electricity. Recycling is good for everyone!

**C.** When people have a cold, a fever, or the flu, they usually go to the doctor for help or they get some medicine from the drugstore. But many people also use home remedies for common illnesses. Lots of people drink hot chicken soup when they have a cold. They find it clears the head and the nose. Some people rub oil on the chest for a cold. Other people drink a mixture of red pepper, hot water, sugar, lemon juice, and milk or vinegar. Here are some simple home remedies.

**Bee stings and insect bites:** Wash the sting or bite. Put some meat tenderizer on a handkerchief and then put it on the bite for half an hour.

**Burns:** Put the burn under cold water or put a cold handkerchief on it. But don't put ice on the burn.

**Coughs:** Drink warm liquids or take some honey.

**Indigestion:** Drink some water with a teaspoon of baking soda in it.

**Insomnia:** Drink a large glass of warm milk.

**D.** People pollute the environment by throwing litter or garbage all over the places every day. They also dump empty bottles or cans into the rivers, lakes and seas, making the water unclean. They also cut a lot of trees to get wood pulp for making paper. To protect the environment, everyone should classify and put the garbage in a certain bag for making compost and they should recycle waste paper to avoid cutting a lot of trees. We can protect the environment by doing like that. We also should plant more and more green trees because trees help to hold the soil, prevent us from floods and give us fresh air and shade in summer.

**E.** A girl was riding a bike when she had an accident. She fell off her bike and hit her head on the road., her head was hurt and it was badly bleeding. However, she was still conscious. It was an emergency so people called an ambulance in order to take her to the hospital. While waiting for the ambulance, some people tried to stop the bleeding by using a handkerchief to cover the wound. Then they put pressure on it and held it tight. They tried to talk to her so as to keep her awake. After about ten minutes, the ambulance arrived and the victim was taken to hospital. Thanks to the timely and proper first-aid, the girl was safely rescued.

**F.** John Baines is an environmentalist. He is interested in all things to do with the environment and the need to protect it. Two years ago, he got his bicycle out of the garbage and repaired it, and now he uses it as much as possible. He uses his car less. When he does shopping, he always walks now. He uses public transport when he can, usually going by bus. About in the home, he saves as much as he can. He doesn't throw rubbish away. He has different bags for different things. One bag has all the cans going

into it, from the cat food to the beer. The second bag has all the papers going into it, and the third one has bottles such as oil bottles, wine bottles. But the milk bottles still go on the doorstep so that they can be reused. He takes these bags to places where they can be recycled.
