IV. Read the following passage. Decide if the statements from 17 to 20 are True or False and choose the correct answers (A, B, C, or D) for questions 21 and 22. (1.5 pts.)

Natural resources are things we use that come from Earth. Our natural resources are limited. This means that they will not last forever. Some are renewable, like when you plant a new tree after you cut one down. Others are not renewable, like when you dig coal out of the ground. Once it is used, it is gone.

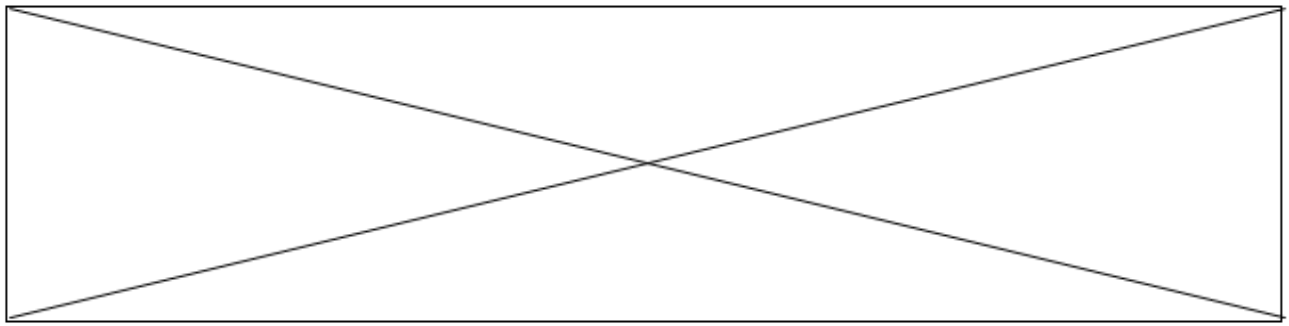

People are aware of the fact that Earth's natural resources are limited, and can do things to help conserve those resources. When you try to conserve a natural resource, you try to use less of it so that it does not get used up so fast. People can save fuel, like gasoline by riding a bicycle or walking when the distance is short instead of driving to everywhere.

Water is a very important natural resource because we all need it to stay alive. We can conserve water by making sure that our pipes and faucets do not leak. We can also conserve water by making smart choices, like only using the dishwashers or washing machines when they are full.

- 17. The Earth's natural resources are limited.
- 18. Coal is one of the non-renewable resources.
- 19. People should walk or travel by bike so as to save fuel.
- 20. Checking pipes and faucets for leaks can't help conserve water.
- 21. What is the passage mainly about?

- A. The renewable energy resources
- B. The importance of water
- C. The environmental pollution
- D. The conservation of natural resources
- 22. It can be inferred from the passage that we can save fuel by _____.
- A. riding a motorbike to everywhere
- B. reducing the amount of driving
- C. fixing the leaking pipes
- D. planting a new tree
