The population of Vietnam has changed a lot since 1990. In 1990, the population was over 66 000 000, while in 2014, it was over 93 000 000. The main cause for this change is that Vietnam's birth rate is higher than its death rate. The death rate has decreased as life expectancy has increased. In 1990, life expectancy was 70, while in 2014, it was 76. It has increased because more people have better diets. Also, they now spend more money on healthcare. Since 1990 Vietnam's population has increased a lot.
